

E.Z. (ENVIRO-ZORB)

A Super Absorbent Polymer (SAP) Crystal designed to absorb high volumes of liquid into itself, thus allowing the liquid, and any contaminants housed within, to be removed/transported in a much easier and affordable way. Consider the ways in which E.Z. can simplify cleanup.

Make your space AQUA Tite

30 lbs.

MADE IN THE USA 

E.Z. is a versatile substance with a wealth of practical applications.

APPLICATION INSTRUCTIONS:

Topical Application: Lightly broadcast a layer of E-Z over contaminated liquid waste material. Using broom, squeegee or rake E-Z into liquid material until absorbed. Add additional E-Z as needed*.

For Containment: Pour a line of E-Z to create a dam to contain contaminated liquid. Sweep or squeegee contaminants into E-Z to maximize absorption of liquids*.

After the E-Z and the contaminants have turned semi-solid, sweep E-Z and properly dispose of the substance.

Once clean up is complete, your preferred method of disinfection is necessary.

COVERAGE: *Absorption may vary depending on the volume and type of solids present in the water. The more product used, the quicker the results. 1 lb of E-Z can absorb up to 25 gallons of clean water. 1 lb of E-Z can absorb up to 10-12 gallons of dirty water.

WARNING: May cause an allergic reaction. May cause eye or skin irritation. May be harmful if swallowed.

FIRST AID TREATMENT: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If irritation persists, seek medical attention. IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs, seek medical advice. Wash contaminated clothes before wearing again. IF SWALLOWED: Rinse mouth and throat thoroughly with water. Call POISON CONTROL or seek medical advice if you feel unwell. Keep out of reach of children.
